DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

None of the prior art of record is seen to disclose or suggest the limitation of claim 1 that at least a first transistor having a control electrode coupled for receiving a bias voltage, a first electrode connected to said output and a second electrode connected to said input through a resistor and a second transistor having a first electrode and a control electrode in common to said input and a second electrode connected to a power supply terminal.

For example, the closest reference found, Vorenkamp et al. (US 5,463,308), teaches a transconductance circuit to convert a differential input voltage, supplied as two signals on two inputs, into a differential output current, characterized in that, where each of the two signals of said differential input voltage is supplied to each input through a follower transistor connected to said input by its emitter and receives said signal on a control electrode, each of the two inputs of the transconductance circuit is connected to a respective current source that is dynamically controlled by the other input of the transconductance circuit, said current source being such that the current supplied to each input by said current source eliminates current variations caused by voltage variations of the input voltage signal, wherein the transconductance circuit comprises two sides, each side comprising an input, an output, and wherein the first and second transistors of the first side are different from the first and second transistors of the second side, but does not teach at least a first transistor having a control electrode coupled for receiving a bias voltage, a first electrode connected to said output and a second electrode connected to said input through a

resistor and a second transistor having a first electrode and a control electrode in common to said input and a second electrode connected to a power supply terminal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
